JUSTIN HUNTER

Experienced software development leader with 20+ years of expertise in Golang, Perl, Ruby, Java, and Python. Proficient in Docker and Kubernetes. Demonstrated success in developing, leading, and optimizing projects. Skilled in leveraging cutting-edge technologies to deliver scalable, efficient, and reliable solutions. Strong leadership qualities, adept at managing cross-functional teams. Expertise in software optimization, agile methodologies, and industry-standard frameworks. Proven problem-solving skills and attention to detail. Committed to exceeding client expectations and driving innovation.

EXPERIENCE

Mediamath — *Staff Software Engineer*

JUNE 2018 - JUNE 2023

- Led the global API backend team for the flagship MediaMath Terminal One product, used by over 1,000 advertisers on a daily basis, over $500m in yearly spend under management via API, requiring 99.999% uptime and zero data issues
- Managed data syndication to other departments (Finance, Bidder, Support) via DB replication and Kafka pipelines.
- Directly managed a globally distributed team, including full time staff and contractors, carrying out regular performance reviews, bonus calculations and informing senior leaders of team performance and future requirements.
- Worked directly with senior product managers and other engineering leads to establish a roadmap, architect solutions, consult on and manage dependencies.
- Worked with support teams to establish facts, and help to resolve questions surrounding customer expectations, billing queries etc.
- Managed integrations with vendor partners including Oracle Bluekai, Peer39, Factual (FourSquare) and Digital Element.
- Experience in migrating large applications to/from cloud and datacenter, including the most recent migration onto on premises Kubernetes cluster.

Highwinds / Stackpath — *Systems Architect*

AUGUST 2016 - JUNE 2018

- Developed and maintained multiple ETL processes using Golang, Python, Kafka, Logstash, Elasticsearch, and MySQL.
- Managed and enhanced an existing ELK cluster (Docker, Elasticsearch, Logstash, Kibana, Consul).

Infoblox — *Staff Software Engineer*

SEPTEMBER 2012 - JULY 2016

Cantella — *Software Engineer*

SEPTEMBER 2010 - SEPTEMBER 2012
